Emma Watson Online is proud to announce the start of exciting XOOPS guides on making access to content more search engine and user friendly.

Our first guide in the series will show you how to use mod_rewrite to turn:
http://www.yoursite.com/modules/content/index.php?id=1 into
http://www.yoursite.com/page-title.html

You can read the guide at:
http://www.ewonline.net/xoops-friendlyurls.html

The next guide in the series will show you how to easily link to that content in your XOOPS pages and blocks.
