XosC .73 Beta
Fera **T**ech, **I**nc. releases the XosC ecommerce and invoicing module.

This module is a complete online solution for online sales and invoicing. This is module is reworked from FlinkUX. Login bugs and compatibility issues have been fixed and is working in Xoops version 2.0.16. There are several included payment options and shipping options as well.

On top of bug fixes the following features have been added:

- Incorporation of a WYSIWYG editor for Front Page, Logo and Product Descriptions
- E-Mail code has been completely rewritten to include SMTP Auth
- Ability to hide categories and products and manually add them through admin section
- Inclusion of Google Checkout and Quote system
- Manually edit/add customers,
customers automatically receive e-mail with registration information
- Manually edit/create orders and invoices for clients
- Website profit reports have been added
- Website tax reports for sales tax have been added
- E-mails converted to HTML
-
Customer Groups allow you to
designate tax exempt customers or specific payment/shipping options per group
