Hey everyone at Xoops.org,

Ive created a top sites site for sites Made with xoops. I thought it would be a cool idea to have everyones xoops site in one directory, but be able to vote for each site. The site is finished feature wise, but its actual look and buttons aren't the final design. But any way i hope that everyone will submit there site and we will see what happens. Also im going to turn the top sites script into a xoops module.
