

XOOPS Uploader Security Patch Released - XOOPS

NEWS_PDF_AUTHOR: phppp

NEWS_PDF_DATE: 2007/10/1 6:46:56

There is potential vulnerability identified in uploader class in case upload configuration is not set properly by modules.

The patch is applicable to all XOOPS versions.

Download from [SourceForge XOOPS](#).

Instructions:

Upload the two files /class/uploader.php and /class/mimetypes.inc.php to your /class/ folder and overwrite existent files.

You are highly encouraged to implement the patch to your existent XOOPS system.
