

Vista_K Theme - Themes

NEWS_PDF_AUTHOR: aph3x

NEWS_PDF_DATE: 2007/10/3 4:41:32

Vista_K theme is a 3column XOOPS theme.

3d column (right one) is **mandatory** and if you don't have right column blocks, the center ones **WON'T** span to fill the void left!.

Since transparency is something that older version of IE can't do, the theme file includes special tags for IE browsers and special tags for al the other major ones.

Folder contains header PSD for link personalization, the theme itself (dooh!), and readme file which i **strongly** advise you to read it before start messing with the theme

Enjoy!

Theme can be viewed in action [HERE](#)

Theme can be downloaded [HERE](#)
