A new site created with XOOPS [Rasme](#). The site has been online for a few month.

forum

fixed for Arabic language

- 1- fixed rss in the news and other module I add php class to convert utf-8. Persian I'm still working on it.
- 2- module xhld0 now Support Arabic.

myalbum have more than 5000 images and icons.

Changed with module

- 1- send ecard
- 2- upload image with no change with name
before 100.jpg now any-name.jpg
I read this in http://xoops.peak.ne.jp/md/d3forum/index.php?topic_id=2418
- 3- When you open image, the Title in Web browser same image name.
- 4- display video and music in the Web browser . add time for movies & music.
