After finally deciding on our name, logo, and many other things, I finally finished our theme. I based the theme off of one that I downloaded from BCOOL (MANY THANKS!), and this is what I came up with. Simple, yet effective. It also matches our official myspace page, which I thought was an accomplishment in itself. We all know how much of a pain in the rear that the myspace layouts can be.

Here are both sites.

Thanks again to xoops for allowing me to put together yet another site with ease.
