

Sybasefan.com, a full SEO hacked site - YAXS

NEWS_PDF_AUTHOR: riceking

NEWS_PDF_DATE: 2007/10/29 4:50:08

4 years ago, I had a willing to establish a site about Sybase ASE database, which would be a help and convenience to the Sybase DBAs and developers.

Today the willing comes to be true. Recently, I have spent about one month on buliding a new site--<http://www.sybasefan.com>.

Here are some characteristics:

--Designed by XOOPS 2.0.16;

--Modules: newbb, news, article, x_movie, smartsection, wfdownloads, planet;

--All the modules are hacked;

--SEO hacked. All URLs are rewrited to '.htm' likes;

Unlike the Oracle DBAs and developers, the Sybase DBAs and developers are not always lucky enough to get the resources needed.

Hope the site would bring a change.
