[Sublime Design Studios](#) is happy to announce the release of 2 new paid themes entitled Perfection and Perfection Dark.

Perfection:

Perfection Dark:

Both themes are W3C CSS & HTML compliant. I will also be releasing forum image sets for each theme as a seperate package at a date to be announced. I'm also considering releasing a few Flash addons for each, Flash login in the header, flash nav bar, etc as a separate package as well.

Note: For security purposes, your [shop](#) account is separate from your XOOPS account at Sublime Design so you will have to re-register at the shop to purchase a theme. Thanks all.
