Xoops*Visit

Version 1.0

Auteur : MusS

Xoops*Visit is a module that allows you to display a simple counter. Formerly under the name User * Count, it was simply known as a module name is already covered in the repository modules. Some change in its structure has been given for the arrival of the next version of this module.

He has for the moment two blocks:

- * Block "collector" who takes care of counting all your visits, it is better to display it on all your pages to count all visits.

- * Block "meter" that displays your meter and whose appearance is run in the module's preferences.
