MakePayment v0.62 - Modules

NEWS_PDF_AUTHOR: wishcraft

NEWS_PDF_DATE: 2007/12/12 3:50:50

Module: **Send Money**
Merchant: **www.intabill.com**
Version: 0.62
Author: Simon Roberts aka wishcraft
Compatible: All Versions
SourceForge:http://sourceforge.net/projects/xoopsmakepaymen/
Download URL:http://bin.chronolabs.org.au/makepayment.zip
Xoops URL:https://xoops.org/modules/repository/singlefile.php?cid=92&lid=1673

This is the first version released for makepayment for xoops for handling a payment via the credit cards available with Intabill, you will need to fill out the merchant application contract forms, scan them and email them back to me for me to set up a merchant account with intabill for you. My rates start at 3.5% upto around 10% for adult services like escorting.

This module utilizes a GPL Soap class library called nuSoap to do the echeck or credit card transactions; with an intabill merchant account you have your own test credit and echeck numbers. We will be writing the refund module for xoops soon, but for the moment this can be handled through the intabill terminal.

If you want to contact intabill directly, you will need to quote my author name for speedy result as it is listed as a reseller there, intabill details are found at www.intabill.com an email for the implementation officer there is Matt Maxwell [matt@intabill.com].

Key Features: No more redirections to paypal or worldpay | Bill from within your xoops portal | source forge Repository | 24Hr Support from intabill.com

System Requirements: Merchant ID from Intabill | ECH Approval and Application to Intabill

I will be writting this out to the final release there is a little bit more to do on the admin menu but this is the first payment module for xoops, that allows you to directly bill credit cards in xoops rather than having to use something like paypal.
