

F5Registry Website - YAXS

NEWS\_PDF\_AUTHOR: Bluenoser

NEWS\_PDF\_DATE: 2007/12/26 4:02:14

[F5Registry](#) is an auto registry website using a custom module that I wrote.

The autoregistry module has the following features:

- \* Setup for one make.
- \* Multiple models and model years.
- \* Hosted photo images.
- \* Linked from user to auto or autos.
- \* Notifications to track new autos.
- \* Most popular auto.
- \* Automobiles by country or state.

I plan to release the module to XOOPS once it's packaged and documented properly.
