

XoopsGallery Module 'init_basic.php' Remote File Include Vulnerability - Security

NEWS_PDF_AUTHOR: phppp

NEWS_PDF_DATE: 2008/1/11 15:18:07

XoopsGallery is prone to a remote file-include vulnerability because it fails to sufficiently sanitize user-supplied data.

XoopsGallery 1.3.3.9 has been confirmed vulnerable.

we advise you to upgrade to XoopsGallery 2.1+ or inactivate the module **immediately** until this issue is solved.

Thank SecurityFocus, Eugene Minaev and [Northern](#) .
