A new congress site, this time using Mastop Publish for the contents and News for the presentations on top of my own bugfixed XOOPS EXM edition. Tableless layout, all block & content divs are absolutely positioned around a relative positioned container div. It also uses DuGris' CAPTCHA, as usual on my sites.

MAstop Publish has been modified to use a different folder name. Just look into the module's language files to find the folder name and change it before copying and installing in the folder you want.

Still on the works.
