XoopsLifeType 1.0.2 RC - Modules

NEWS_PDF_AUTHOR: domecc

NEWS_PDF_DATE: 2008/1/14 14:54:00

The XOOPS China Community is pleased to announce the release of XoopsLifeType 1.0.2 RC!

XoopsLifeType is a XOOPS module integrating LifeType (http://www.lifetype.net) 1.2.5, which is an open-source blogging platform with support for multiple blogs and users in a single installation.

Download

You can download XoopsLifeType from xoopschina@sourceforge:
http://sourceforge.net/project/showfiles.php?group_id=120014

Features
----
1. Integrated user acount system of XOOPS and LifeType;
2. Integrated LifeType's installation system into XOOPS, so you can install/upgrade/uninstall LifeType directly in XOOPS's admin panel;
3. Added some XOOPS' blocks, such as Latest blogs and integrated XOOPS' search. (Note: we've changed LifeType's original /templates/ to /themes/, and the /templates/ contained XOOPS's templates only);
4. Added XOOPS Frameworks' CAPTCHA to anti spam-comments;
5. Supported none UTF-8 encoding, such as gb2312, big5.

TODO
----
1. Moving writable folders out of lifetype (cache, tmp and gallery)

System requirements
----
1. XOOPS 2.0.X (Note: We've tested XoopsLifeType under XOOPS 2.0.x, but not XOOPS 2.2.x);
2. Frameworks 1.20+ (Download: http://sourceforge.net/project/showfiles.php?group_id=120014).

Installing

----
1. Upload XoopsLifeType to your server's ROOT/modules/, and ensure the structure is ROOT/modules/lifetype/XOOPS_version.php;
2. Ensure "ROOT/modules/lifetype/tmp/" and "ROOT/modules/lifetype/gallery/" are writable by the webserver (chmod 777);
3. Click XoopsLifeType's Install button in the Control Panel "System/modules";
4. After installing XoopsLifeType, you can create a default blog simply by visiting "www.yourwebsite.com/modules/lifetype/index.php".

Upgrading

Overwrite your existing files with the new XoopsLifeType package.

Feedback

For any suggestions, comments, bug reports and feature requests about XoopsLifeType, please visit the development site at the XOOPS China Community: https://xoops.org.cn.
But if you have any problems or suggestions with lifetype itself, please visit lifetype dev community: http://www.lifetype.net.
