The XPETITIONS website is online at:
http://www.informatux.com/xpetitions

Do not hesitate to inform me about the bugs met so that I can make evolve the module to the next version 0.18 stable.

On the website, there is a forum, a faq, all the versions and their description, etc.

All the odd numbers will be versions beta or RC, and the pars, stable versions.

Thanks to all the testers.
