Hello, You often use tables in your pages, and sometimes the reading of many lines and columns is not not easy. There is a means very simple to make definitely more readable your tables. This method is ultra-simple, any Javascript line, completely integrated with your theme cause you use 2 well-known classes, even and odd.

Ligne	Jour	Température (°C)	Pluie (ml)	Indice de confiance
2	Monday	18	0	4
3	Tuesday	12	0	4
4	Wednesday	16	30	3
5	Thursday	19	20	3

See method below... Method: For each line of your table, c'est with saying, for each element HTML [i]/i], write this:

That's all! There is a small alternative: If you wish that the line be transformed at the time of your 1st mouseover, then remove in the , element "class=even". Here, the result:

Ligne	Jour	Température (°C)	Pluie (ml)	Indice de confiance
2	Lundi	18	0	4
3	Mardi	12	0	4
4	Mercredi	16	30	3
5	Jeudi	19	20	3
