Hello, You often use tables in your pages, and sometimes the reading of many lines and columns is not not easy. There is a means very simple to make definitely more readable your tables. This method is ultra-simple, any Javascript line, completely integrated with your theme cause you use 2 well-known classes, even and odd. Ligne Jour Tempér Pluviom Indice

		ature	étrie	de conf

4	Wedne sday	16	30	3
5	Thurda	19	20	3
	у			

See method below... Method: For each line

of your table, c'est with saying, for each element HTML [i][/i], write this:

That's all! There is a small alternative: If you wish that the line be transformed at the time of your 1st mouseover, then remove in the , element "class=even". Here, the result: LigJou Te Plu Ind
