

Serverinfo - Modules

NEWS_PDF_AUTHOR: Jan304

NEWS_PDF_DATE: 2002/9/7 18:36:36

After working Day and night we (Jan304 and w4z004) managed to combine 2 modules in one. We both did found on the internet 2 beautiful programs.

They have there own spec., for example sysinfo only works with unix related servers and sysinfo only works with win32 combined with apache (not IIS). We were thinking of combining it and then make it a xoops module by modulizing it. We did!

Here are the links to download:
