x-Cake is the Rapid Development Suite for PHP Applications, it is stable release 1.1 of cake modified to work in the modules section of xoops.

You can quickly write modules for xoops if you know the Cake Method and structure, or import your existing Cake Framework Application into a more dynamic environment like xoops. For support and information on cakephp try their website..

Quote:

CakePHP is a rapid development framework for PHP that provides an extensible architecture for developing, maintaining, and deploying applications. Using commonly known design patterns like MVC and ORM within the convention over configuration paradigm, CakePHP reduces development costs and helps developers write less code.
