I have written in the past telling you the succeed I had with my site <http://www.zycu.com>, made with xoops and basically the myalbum module, achieveing high numbers of visits in the time.

But now, I have the honour to announce that with less than 2 years online, a xoops site has around 2 million page views per month, reaching 200.000 unique visitors per month.

That is a high amount of traffic, and we have even bigger expectations for the future! The site is in Spanish, and is becoming quickly one of the leadership in funny pictures sites!

Once again, thanks you Xoops!
