I always have problem with the text in the description area of xcgai module, if you write a long description and do not take care of the break lines your output text will result in a long text line, so I modify the template xcgai_display.html and around the line #29 look for a code like this:

and proceed to change to this one:

As you see we change the nowrap for wrap, that makes the trick at least in my case, hope it will solve the problem for another xoopers

Regards
