

xcgal: "Upload more pictures" and "keywords" - Hacks

NEWS\_PDF\_AUTHOR: Anonymous

NEWS\_PDF\_DATE: 2008/3/31 20:40:00

Xcgal users will be familiar with the "Upload more pictures" function which allows up to four pictures to be uploaded in one go and will know about xcgal's "click on a keyword" search function which locates all pictures having the chosen keyword. Keywords are therefore a really important tool for xcgal users.

Unfortunately, users will also know that keywords cannot be entered for pictures uploaded using the "Upload more pictures" function - they can only be added by editing the picture later.

..... until now 🤖

I've amended two xcgal files (db\_input.php and xcgal\_uploadmore.html) to allow keywords to be entered using the "Upload more pictures" function and the time of upload.

I've packed the amended files and their (renamed originals - it will be obvious!!) into [this zip file](#).

Hope it is useful.
