## Two new cool Websites from Brazil - YAXS

Posted by: Mamba

Posted on: : 2008/3/31 22:20:00

The Web design team [Bertholdo Consultoria](#) from Brasil developed two beautiful Websites using XOOPS. Both of them are very creative and show that with the right mixture of talent and creativity, sky is the limit for XOOPS Developers.

To be honest, I would never know that they are made in XOOPS, because they look so un-XOOPS 🤖

But exactly because of that, they are a true inspiration for XOOPS developers to test the limits in their designs and creativity, and go beyond the typical boxy look and feel.

Congratulations to the designers!!! It is people like them who are showing the true power of XOOPS and its limitless capabilities!

And now the Websites:
