## XOOPS Menu Extension for Firefox - XOOPS

Extensions for Firefox are becoming popular, so it was time to create one for XOOPS.

Since I never developed one, it was an interesting exercise. But once I found the right [tutorial](#) and the right tools, which were listed at the bottom of this articles, especially the [Firefox Extension Wizard](#), it was relatively easy.

The longest time I spent was on defining the structure. I decided to group the links based on the user activities:

- Learn
- Use
- Support
- Develop
- Contribute

If you have links that you use very frequently and believe that a XOOPS user would benefit from having them in this Menu Extension, please let me know, and I'll add it in the next release.

You can download the current release [here...](#)
