

XOOPS Menu Extension for Firefox - XOOPS

NEWS PDF AUTHOR: Mamba

Extensions for Firefox are becoming popular, so it was time to create one for XOOPS.

Since I never developed one, it was an interesting exercise. But once I found the right tutorial and the right tools, which were listed at the bottom of this articles, especially the Firefox Extension Wizard, it was relatively easy.

The longest time I spent was on defining the structure. I decided to group the links based on the user activities:

Learn Use **Support Develop** Contribute

If you have links that you use very frequently and believe that a XOOPS user would benefit from having them in this Menu Extension, please let me know, and I'll add it in the next release.

You can download the current release here...

BTW you can check out other good extensions here...
