Recently the [ONDD](#) (Online Nursing Degree Directory" published a list of "[The Top 100 Open Source Software Tools for Medical Professionals](#)". Within the CMS category, they listed XOOPS as #2 after Joomla, saying:

"Manage your web content with XOOPS, whether you're setting up a forum on your site or just want to work on your blog."

We are absolutely delighted with the recognition, and very proud of the fact that more and more people see XOOPS as the top CMS system in the world!!!

Keep those awards and recognitions coming!!! 🏆
