Some months ago I customize my site using a theme from : [Xoopsfactory](#), I used the xf_05_2007_lightblue theme, of course the actual theme doesn't resemble the original.

I decided post here cause I will not use it anymore, so if you want it download it from here: [de-ramonenses.zip](#)

Also I include the Page Peel script if you want to use it: [Page Peel script](#)
