This is an RC release and is not recommended for production sites yet!!!
You have been warned!!!

Yogurt Social Network version 3.2. RC1
By Marcello Brandão
Yogurt by Marcello Brandão is licensed under a Attribution-No Derivative Works 2.5 Brazil.
=============================

This module features a simple Social Network for your xoops site.
Very recommended for communities sites. It allows users to have a personal album of pictures, a personal album of videos from youtube, a list of friends, a public wall for messages(scraps), to create communities (tribes), to adjust configs to set who can see what, it also allows Admins to block users from using the site for a certain amount of time.
The use of the module is very simple and the front end is clean and beautiful thanks to the lightbox2 feature and to jquery tabs.
