NEWS_PDF_DATE: 2008/6/16 5:50:00

Good news from [Zoullou](#): one of the best XOOPS Calendar module has been updated:

eXtCal 2.2.0 is out after few month of developement. This version is a stable release, so you could use it on production site.

The 2 biggest added feature are reccuring event and a feature to allow "online module update". This feature is very usefull when you have several site that use the module and you want to have up to date module.

[Download it from here...](#)

Thank you, [Zoullou](#) for your hard work!!!

You could find below the changelog :

- Fix bug : Event year selection box don't work on year.php page
- Fix bug : Blank page when event is submitted with wrong date format
- Fix bug : Timezone offset bug on calendar pages and event page
