Remember those grandparents we still hear from all love their soft drinks and their software - This is just the first release of X-Forum; there will be many more.

With X-Forum you can have all the connivence of the modular newbb path without the result. Based on CBB with a sound environment that even your grandma can use, I know mine does this is solid stuff coming directly to you under GNU Licenses.

Complete with Easy Path SEO Guide and help in the preference, you can even with some simple SQL Injections transfer your old CBB 2.x or 3.x over to X-Forum with ease.

In later version we will be updating more the the templates to give it a nice evenly rounded abstraction without that old box XOOPS look from just static templates for you to build from.
