Hallo from Germany,

take a look at the new **Info-Center of the English Bulldogs in Germany!** It is built with Xoops CMS with many different modules!

At the moment I "fight" with the Sitemap - and keep updating the Website with recent news! Also I will take the module MyQuiz - and Umfrage!!

But i need a little bit time - to understand how i must do this!! I work with XOOPS since February 2008 - I'll never before have worked with HTML or such thinks! A good friend helps me by the first steps - and since the 2nd March the [BulldogNews](#) is online!!!

Xoops is soooo nice - but i must learn more!!!

At the moment i tried my second homepage - about my private dogs - you can have a look here: [English Bulls!!!](#)

Have you some comments for me???

Many thanks for your time - have a nice day - greetings Bärbel
