

De Norske Snedkere - YAXS

NEWS_PDF_AUTHOR: Runeher

NEWS_PDF_DATE: 2008/8/2 16:20:00

[De Norske Snedkere](#) is the new site for my carpenting company. It's in Danish only, as it is meant to be used very locally...

I have redesigned the vista_k theme a bit. Normally i replace the logo image without blinking, but this time I actually liked the logo image that came with the theme, so I decided to use it... The vista_k theme is an excellent theme with an easy to understand Photoshop sliceing for the menu... 😊

I have used very few modules as i don't need much on the site:

SmartFAQ has been used for a tips and trick module for home management...

I have used two instances of myAlbum and removed most of the ugly little icons that comes with the module.

For the 'vores ydelser' section I used a 'blank' module and made a block for easy online editing.

The contact_plus module is used for the contact form and I added some html to the template.

And of course the News module in case we have something new to tell...

A big thanks go to [andersssk](#) for translating the site... 🙏

Hope you like it!
