X-Forum is a completely extensible forum module for XOOPS, this is the complete stable release of the first version which seem to have an emptology problem from an absent area outside xoops. It does require Frameworks 1.35 as soon it will include graphs and forum performance analysis.

Designed for XOOPS 2.3 and earlier version, it was written in response to problems with earlier forum titles, that had in some cases installation issues. With a broad range of options. X-Forum is a great solution to your forum requirements, complete with RSS Features and image management.

It will utilise a wide range of options and allow your community to discuss issues, raise topic and solution. Complete with .htaccess example and SEO with a medium URL.

This is the lite edition of X-Forum, there will one with all those lovely features like topic and forum graphing quiet soon.
