

Acida Software uses XOOPS again for its site - YAXS

NEWS_PDF_AUTHOR: vamptrix

NEWS_PDF_DATE: 2008/9/1 4:40:00

After a few months of using Pluck, we needed a more powerfull website, with a nice download system, because our server couldn't hold all of the downloads, and Pluck doesn't has a downloadsystem at all. So we used Wordpress, while we were preparing our new website, which looks better then ever!

Check it out: [Acida Software](#)

Installed modules:

Protector

eXtGallery

Liaise

Mastop Publish

Downloads

News

Oledrion

and has the theme EXM applied (for the admin panel)

The theme we use on the site is based on [the Zenlike theme](#), but I've modified it heavily to suit more in the Acida Software-style.

We're using XOOPS 2.3 because it's simply the best CMS we've ever used, easy but yet powerfull, and easy to get it up and running.
