Gifts45.com is focusing on social news too

After a long busy period, with no time for updates, we left other projects for a while, to implement Onokazu's great social-news ( digg style ) module - [Xigg](#)

[Gifts45.com](#) is now a better platform for site promotion (or products promotion) and is focusing in the "Shopping / Gifts / Travel" fields of interest.

The site is heavily based on two main modules: weblinks and xigg (thank you Ohawada & ono for this exelent modules)

Direct link to the new [social news](#) section is: <http://www.gifts45.com/modules/Xigg/index.php/> ( we called it " [what's on](#) " )

Those who use our [inTHEtube module](#) and are interested to see what it inspired us to do with it (not xoops unfortunately, due to some tech issues) - can see : [inTHEtube.TV](#) - we liked the module - so we made a whole site around the inTHEtube idea ( site is in beta stage )
