X-Torrent is a complete torrent solution for Xoops 2.3, 2.2 & 2.0. There is a lot of potential in torrent sharing, this allows you a company, business, personal or educational institute to distribute data via torrents which is useful. Due to the large volume of difference between internet speeds in the world, torrents now consist of over 18% of broadband traffic. Torrents are becoming a commodity these day from small to large files.

Currently x-Torrent offers a large range of options, but we will be releasing a new version in around 6 months, if some spare time comes in we will be writing in more options and systems. x-Torrent is a module which offer full control of torrents in XOOPS, it will poll the torrents as well as download file information, seeds, leeches, trackers etc, of the torrent.

I will now work completely with PayPal integration and allows your end clients of your site, to charge for access and material by torrent services. This is useful for a wide range of commercial and business applications, from a MP3 house to a Movie Stand outlet, you can allow people to purchase any digital material via Torrent.

The announce appears from the filehttp://yoursite.com/modules/xtorrent/announce.php You can redirect this at the root with a .htaccess file to something that is shorter.

Now with X-SOAP plugs-in you can exchange Torrents with similar XOOPS Installations with easy to use forms and systems in the admin panels.
