

Orange Xoops - Themes

NEWS_PDF_AUTHOR: Burning

NEWS_PDF_DATE: 2008/9/19 2:24:21

Orange Xoops is based on Morphogenesis 2.10 template.

Specifications :

- 3 columns
- full screen
- Xoops 2.0.18.x

Contents :

- files required to make it works with Xoops 2.0.18.x (means : 2.0.18 / 2.0.18.1 / 2.0.18.2).

These files modify Xoops Core but are required with morphogenesis themes :

- /include/common.php
- /language/french/theme.php (some DEFINE have been added especially for Orange Xoops theme)
- /jseffects folder (to place at the root site, contains pngbehavior.htc to handle .png transparency)
- original template Orange2 by <http://www.free-css-templates.com>
- system templates overridden (/themes/orange_xoops/modules/system)
 - system_redirect.html
 - system_siteclosed.html
 - system_userform.html
 - blocks/system_block_login.html
 - blocks/system_block_mainmenu.html
 - blocks/system_block_search.html

Scripts (/js folder) :

- rel.js (we can replace rel="nofollow" by rel="external")
- FX.Slide (mootools.js + FXslide.js) by [Mootools.net](http://mootools.net) : sliding zone wich contains bottom blocks (center column)

Warnings about the sliding

Bottom blocks are locked in the sliding zone. This one is :

- closed by default (to learn more about this parameter, readme.txt in /js folder)
- not displayed if none bottom blocks exists
- only displayed to members (this condition can be changed / erased by editing theme.html (lines 87 to 118))

Credits

- <http://www.free-css-templates.com> for the Original template
- [Kris](#) for Morphogenesis 2.10 template
- [Bleekk](#) for these cool code (blocks edition directly from Front side)

[Download](#) | [Preview](#)

Happy Xoops 🍷 !
