YATSS: Yet Another Turkish Support Site - YAXS

NEWS_PDF_AUTHOR: hrac

NEWS_PDF_DATE: 2008/9/28 21:50:00

Hello,

I've launched a new Turkish local support site. This site will have Turkish translation packages of modules and Turkish discussions about XOOPS support.

Here is the link:
http://www.xoopstr.org

We will also hold and discuss new modules developed by Turkish XOOPS developers.

I would like to keep this site as much as similar to xoops.org. So our visitors will feel that they are using original xoops.org website. So I choose same thema (zetagenesis) like xoops.org.

Best regards
Hirac
