myReviews v2.0 is available from the downloads section of <http://www.giantspider.biz>.

Updates include: allowing HTML in all text boxes, review graphs that look very similar to the graphs used in the Polls module, review subcategories per product and numerous bug fixes for link displays and the random review feature. I have also consolidated reviews and ratings features to a single page, and I have taken out most of the vestiges of the other modules (gsdownloads and myBooks) that seemed to be lingering in the myReviews module. The functionality of myReviews will be incorporated into myBooks and gsdownloads shortly.
