Language Translations of 2.3.x - XOOPS

NEWS_PDF_AUTHOR: Mamba

NEWS_PDF_DATE: 2008/10/6 17:40:00

We've opened a new section on SourceForge for language files for XOOPS 2.3.x

Please check the existing translations, and let us know about any problems. Also, if your language files are missing, please help us with the translation.

You can use the "**lang_tool**" module for it, which you can download from here

But we'll need both ISO and UTF-8 translations. You can save the ISO file as UTF-8 file using notepad++, but make sure that you select in "Format" menu, the "Convert to UTF-8 without BOM" option.

If you do translations, please follow these **translation guidelines**

Once done, please let us know here where can we download them from.
