

Lagoon theme released - Themes

NEWS_PDF_AUTHOR: vamptrix

NEWS_PDF_DATE: 2008/10/30 2:13:19

I've said before I was working on a blue version of Phoenix, called Lagoon, and I'm now finally happy enough about it to release it. I've already started working on a new theme, In Flames (not the band xD). I'll also work more on the new theme site Acida Themes, when it'll fully open up next week (<http://themes.acida-software.com>)

This theme does NOT work on XOOPS 2.2
Tested with XOOPS 2.3.1

Demo: <http://themes.acida-software.com> and select "lagoon"

Download: <http://themes.acida-software.com/lagoon.zip>
