Since our old host, Lycos, is going out of business, we had to move our site, and we thought it was time to clean it up a bit, as our current site is over 1000 MB big. We have moved all of our files to our new server, AcidaServer.

All XOOPS themes and files have been moved to "OTHER" category.

Here are all links:

Phoenix: <http://www.acidaserver.com/other/phoenix.zip>

Lagoon: <http://www.acidaserver.com/other/lagoon.zip>

GuildWars: <http://www.acidaserver.com/other/guildwars.zip>

gw_prop: http://www.acidaserver.com/other/gw_prop.zip

GW theme redirect: <http://www.acidaserver.com/other/redirect.txt>

We hope to provide you some more nice and beautiful themes in the future. We are already creating new ones, and we are using new techniques to make these as beautiful as we can.
