

Gmail Online Signature - Modules

NEWS_PDF_AUTHOR: mariane

NEWS_PDF_DATE: 2009/2/17 15:20:00

I transformed the gmail online signature script to a xoops module. Now with this module you can create online your gmail signature and allow your website members to get their own and special signature.

in the zipped folder you will find the module, also a psd folder.

if you want to change gmail by your own website title, just make the necessary changes with photoshop and save the pictures in the appropriate folders.

After installing the module go to <http://www.yoursitename.com/modules/gmail> to create online signature

Hope you will like it !
