Olï¿½drion 2.2, the e-Commerce module for Xoops by Instant Zero - Modules

NEWS_PDF_AUTHOR: Mamba

NEWS_PDF_DATE: 2009/2/27 15:50:00

Our good friends at **Instant-Zero** announced a new version of their e-Commerce module - **OlÃ©drion 2.2** (read here)

Changelog
- Code refactoring
- Bugs corrections in the checkout page
- New option in config.php: OLEDRION_DONT_RESIZE_IF_SMALLER, when this option is on "true", if pictures are smaller than defined dimensions, then they are not resized
- Addition of a new option in config.php => OLEDRION_AUTO_FILL_MANUAL_DATE
When this option is set to true, the module will automatically fill the manual date when you create a new product
- Bugs correction in the advanced search and addition of a pager
- Better support of Xoops 2.3
- Change in the gateways class and structure
- In the module's administration, manufacturer's names are now clickable
- In the module's administration, the count of products is now visible
- When you add a product, in the module's administration, the module shows you an example for the "Path of the file to download" field
- Correction of several bugs with the Paypal gateway and orders records on some hosts (burning/herve)
- Bug correction in the shelf class (Bezoops/Hervï¿½)
- There were 2 minor changes in the translations, see lang.diff
