**Susheng Yang** ([ezskycn](#)) from [XOOPS China](#) has developed a **Cumulus module** that provides a beautiful, Flash-based 3D Tag cloud implementation.

It is based on Roy Tanck's WordPress module called WP-Cumulus (see <http://wordpress.org/extend/plugins/wp-cumulus/>)

You can install normally as another module, but you need to have a [Tag module](#) already installed.
