[Kaotik](#) has developed a new module Timeline as a proof of concept. It is based on the work of [Simile Widgets](#).

Some examples:

<http://www.recovery.gov/?q=content/timeline>

<http://simile->

widgets.googlecode.com/svn/timeline/tags/latest/src/webapp/examples/monet/monet.html

<http://simile-widgets.googlecode.com/svn/timeline/tags/latest/src/webapp/examples/jfk/jfk.html>

http://simile-widgets.googlecode.com/svn/timeline/tags/latest/src/webapp/examples/test_example2/test_example2.html

He thought that it would be an excellent addition to XOOPS, so he put this together. With enough interest, he might take this further and make it into a full fledged xoops module.
