

MRBS 1.41 final released - Modules

NEWS_PDF_AUTHOR: jobrazo

NEWS_PDF_DATE: 2009/3/20 14:00:00

Meeting Room Booking System MRBS 1.41 final released.
This version is based on the MRBS Sourceforge project version 1.41 and is now a true Xoops module.

Some of the basic features:

Flexible Repeating Bookings

Authentication with your existing Xoops user database

Ensures that conflicting entries cannot be entered

Reporting option

Selectable DAY / WEEK / MONTH views

Authenticate levels (user, admin)

Support for bookings by time or period - ideal for use in schools

Room administrators can be notified of bookings by email

Multiple languages supported (translated to Catalan, Czech, Chinese, Danish, Dutch, Finnish, French, German, Greek, Italian, Japanese, Korean, Norwegian, Portuguese, Slovenian, Spanish, Swedish, Turkish)

Xoops features:

Tested on Xoops 2.0.18 and 2.3.x (php5, mysql5)

All settings stored in Xoops preferences.

Admin section.

Multilingual frontend and backend.

Clone and rename of the module possible (fully automated).

Basic how to guide (multilingual).

External updates page.

English, french and dutch translations included for the backend.

[Download here](#)

Other translations are always welcome.

Can someone also update the repository please?
