Xquiz is a module for Xoops which lets you create multiple option quizzes at a specified time and attach them to categories in your website, users can take part quizzes and module administrators can then view quiz result statistics afterwards.

- \* Manage categories and subcategories
- \* Determine access right permission on categories
- \* Manage quizzes
- \* Manage question for each quiz
- \* Various statistics for the quizzes result details and export to csv file
- \* Uses Xoops notification system (categories and quizzes)
- \* Uses Xoops comment system
- \* Integrated search
