

New Module: Currency Converter - Modules

NEWS_PDF_AUTHOR: Runeher

NEWS_PDF_DATE: 2009/3/22 15:30:00

This module will convert any currency using a live, updated output feed from Yahoo! Finance.

Very useful for any site with e.g. a donation module or a webshop without automatic currency conversion.

The module comes with a block and language files.

Also comes with a useful popup window to keep the tool open when surfing your products.

Currently added languages:

English

Norwegian

Install as a normal module.

If you want to change the 'From' and 'To' Values, open `currencyconverter.php` and find:

[U.S. Dollar \(USD\)](#)

Move the word 'selected' to your preferred 'From' currency

Then find:

[Euro \(EUR\)](#)

Move the word 'selected' to your preferred 'To' currency

Do the same for `currencyconverter2.php` as this one is used by the popup window.

[Demo1](#) ---***---[Demo2 - Integration in price list](#) ---***---[Download](#)
